

# Environmental management system

As Tüpraş, our vision is to be a leading company in the energy sector that respects environmental and life values. Having adopted the principle of following environment and human-oriented policies in all its business processes, Tüpraş is committed to;

- Be carbon-neutral by 2050,
- Realize low-carbon projects taking the impacts of the climate change into consideration,
- Consider risks and opportunities related with climate change, contribute tackling the climate change, focus on sustainability,
- Prioritize energy efficiency,
- Realize renewable and clean energy investments,
- Produce by adopting circular economy with zero waste principles,
- Protect natural resources and utilize them in the most efficient way, increase recycling,
- Reduce water stress with effective water management where the operations take place,
- Reduce raw water consumption with partnerships,
- Reuse and recycle the wastewater generated from the operations,
- Follow up environmental performance with digital technologies, improve and develop them,
- Manage environmental risks with life cycle thinking,
- Support the improvement of biodiversity, protect all species, especially endangered species and endemic species, and natural ecosystems in a way that prevents land degradation,
- Develop sector specific environmental solutions by following up current technology developments closely,
- Evaluate environmental impacts in all investments, consider the best available techniques that enables reduction in the environmental impact,
- Comply with all local and national legislative regulations,
- Carry out communication and cooperation studies with relevant institutions and organizations in the development of legal regulations, other requirements, policies and standards related to environmental management,
- Monitor and improve the impacts of operation to air quality continuously,
- Improve environmental awareness of all stakeholders, especially employees, contractors and affiliates, monitor the environmental performance of suppliers,
- Review the goals constantly and create the necessary resources to achieve these goals,
- Be the leader in effective environmental management in the sector and share the best practices,
- Comply with the environmental goals of Koç Holding,
- Conduct operations by taking the United Nations Sustainable Development Goals as a guide,

within the scope of the Strategic Transformation Plan of Tüpraş.
