

# Security Policy

In order to direct all its efforts for uninterrupted production, Tüpraş, having the vision to be admired for its performance, and to be considerate of environment and lifetime values, shall take all sufficient and deterrent security measures against security risks and violations, take the steps necessary in compliance with the laws and regulations to prevent security incidents before they occur in the area of responsibility, minimize potential risks and damages, and fulfill legal obligations. Thus, Tüpraş undertakes to;

- Develop and implement the contemporary security management practices, and abide by the nationally and internationally recognized security norms,
- Carry on security measures in accordance with human rights, laws and corporate identity,
- Promote security awareness among its employees, solution partners and suppliers; and fully comply with security procedures,
- Establish detection, reporting and recording systems for all security violations and interfere with them in a quick manner,
- Implement the security measures with minimal disruption to refinery operations without endangering the work safety of its own employees,
- Foster confidence among its employees and third parties,
- Work in coordination and collaboration with governmental security and other related agencies, Koç Group Companies and neighboring companies,
- Continually improve own security systems by keeping abreast of security risks, the recent technological improvements in security area and own security system,
- Apply crisis/emergency management procedures rapidly, when necessary,
- Keep the security personnel and systems continuously ready for duty, supported with training activities, tests, drills and inspections,
- Keep the security tools, equipment, weapons and systems in order and functional at all times,
- Use all granted authority including use of weapons and force in the area of responsibility considering the principles of lawfulness, necessity and
