Inhalation: If inhalation of mists, fumes or vapour causes irritation to the nose or throat, or coughing, remove to fresh air. In case of irregular breathing or respiratory arrest provide artificial respiration. If symptoms persist obtain medical advice and have product container or label at hand.

Skin Contact: Wash skin thoroughly with plenty of water. Remove heavily contaminated clothing and wash underlying skin. If medical advice is needed, have product container or label at hand.

Eye Contact: Wash eye thoroughly with copious quantities of water, ensuring eyelids are held open. Obtain medical advice if any pain or redness develops or persists. If medical advice is needed, have product container or label at hand.

Ingestion: If contamination of the mouth occurs, wash out thoroughly with water. Except as a deliberate act, the ingestion or large amounts of product is unlikely. If it should occur, do not induce vomiting; obtain medical advice.

Treat symptomatically.

5. FIRE-FIGHTING MEASURES

5.1 Extinguishing Media

Use foam, dry powder, carbon dioxide and water fog. DO NOT USE water jets.

5.2 Special hazards arising from substance or mixture

Combustion results toxic gases. Hazardous combustion products are carbon oxides, sulphur oxides, nitrogen oxides, carbon monoxide.

5.3 Advice for fire-fighters

Ensure an escape path is always available from any fire.

Use alcohol resistant foam, dry powder, water spray and sand. DO NOT USE water jets.

Avoid spraying directly into storage containers because of the danger of boil-over.

Fires in confined spaces should be dealt with by trained personnel wearing approved breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Wear suitable protective clothing, gloves and eye/face protection. In case of fire: Wear self-contained breathing apparatus. Emergency cooling must be provided. Remove product from area of fire.

6.2 Environmental precautions

Do not allow to enter into ground water, surface water or drains. Contaminated fire-fighting water must be collected separately.

6.3 Methods and material for containment and cleaning up

Recovery of large spillages should be effected by specialist personnel. Small and uncontained spillages should be absorbed with liquid-binding material and collected in suitable containers for disposal. Large spillages should be collected mechanically for disposal. Do not empty into drains or the aquatic environment.
